## 85TH STREET INTERCHANGE

A diverging diamond interchange has received federal approval for construction at the 85th Street and I-29 intersection in Sioux Falls, South Dakota. This innovative design, set to break ground in 2025 and open in early 2027, will revolutionize traffic flow and safety in this rapidly expanding area. By allowing two directions of traffic to cross seamlessly, the interchange will reduce congestion and improve accessibility, addressing the transportation demands of the growing southern Sioux Falls region.

The interchange will enhance connectivity between Sioux Falls and Tea, with 85th Street serving as the boundary between the two cities. Tea's city engineer, Ben Scholtz, highlights the added access to I-29 as a major benefit for commuters and future development. With Tea experiencing substantial growth, particularly in the northern part of the city near 85th Street, this project will unlock significant opportunities for commercial and residential development. Both cities are collaborating on a joint pavement project for 85th Street to support this growth.

For investors and developers, the land parcel near the future interchange presents an unparalleled opportunity to capitalize on enhanced accessibility and increased traffic flow. As the area continues to grow, this property is strategically positioned to benefit from the economic momentum of one of the region's most dynamic corridors.
